To Whom It May Concern:

Horizon Bank has worked with AaSys for well over ten years. They have assisted us with many projects over that period of time. Those projects have included setting up three offices with a fourth on the way in the winter of 2008; a core processor evaluation and assisting senior management with the development of a Business Continuity Plan. We also employ AaSys to support our IT system as well as function as our remote operations center.

In those ten years, the AaSys team has been a very able partner and has assisted the Bank's management in its growth into one of the more profitable banks in the Sarasota-Manatee Market. AaSys' support has allowed Horizon Bank's management and staff to focus on being one of the leading Bank's in the region while maintaining an IT operation that supports our customer's needs and protects their information.
